

SUE AND GARY

2025 Seasons Greetings

For us, this year was a quiet one. We did not do our usual international travel as a result of a variety of health issues. In the spring, Sue had a stent put in her heart. Gary had some respiratory issues that we are still trying to understand and tweak. Happily, we both are recovering well and have stayed active and otherwise healthy but we do miss our travel adventures.

Life does change as we get older and our adventures this year focused more on health care and less on exotic locations. At times we have dared to use the word, "older" to cautiously account for this but for our age we are very active and optimistic.

Because we did not neglect our garden this summer by travel, it was unusually productive and delightful. Our major products were black currants (jam), tomatoes and carrots and they have been preserved in many delightful forms for our future use.

Sue has a new bicycle (aka electric powered 3 wheeler) When we go for a ride, I am huffing and puffing as I try to keep up.

A skiing friend, Bob Anderson, from 40 years ago sent me an old photo and it reminded me of the many years of skiing in the Teton area.

Sue continues to be very active with volunteers at the Morrison Center for the Performing Arts and also belongs to the Daughters of the British Empire.
